DATE DISTR. 29 November 1955 NO. OF PAGES 2 REQUIREMENT NO. RD ALCE ACQUIRED			
NO. OF PAGES 2 REQUIREMENT NO. RD REFERENCES This is UNEVALUATED Information 1. At Slofok on Lake Balaton there are several new factories making machine tools on the left side of the main read going west. 25X1 2. At Tihany on the north side of Lake Balaton there is a new factory of 10-12000 sq. ft. employing 400 making gear boxes and hydraulic drives for machine tools. 3. At Sackesfebervar on the ortskirts of the town there are two machine—tool factories approximately 10-12000 sq. ft., one employing 400 making grinding machines and the other 250 making hydraulic units and grinding heads for machine tools. There is also a small factory of about 5000 sq. ft. employing 50 to 80 persons who were machining castings. 4. The machines used at Sackesfebervar are mainly of modern German and Csech design. Their production methods are up-to-date. About 35 per cent of the employees were women and several of the technicians spoke good English with American accents. 5. The total production of grinding machines is stated to be 40 to 50 in three months. 6. Certain bottlemecks were evident in the sub-assembly sections of both plants owing to a shortage of skilled labor. Training schools are being operated at the factories to overcome this difficulty. 7. The Rékosi Métyás Works at Csepel have about 40,000 employees. There has been some modernisation of plant in the past two years. The electronic section is vary advanced and well equipped with most modern equipment. 25X1 8. The E2H lathe is made at this plant at the rate of 10 a month for each of the four types. 5XIOLE RET	COUNTRY	Hungary	REPORT

The plant is mainly Czech design and production methods are highly efficient and modern. The products, however, are not of modern design except for:	25 X 1
a. Milling machines, universal and vertical type	25 X 1 25 X 1
b. Radial and pillar drilling machines -	25 X 1
c. Universal grinder -	25X1
Materials used for production, methods, and finished product are up to the standard Milling machines are available from stock; the production rate is 15 per month and 20 radial drilling machine could be made available neck in assembly was noticeable.	25X1 s 25X1
Security measures are severe. All visits are accompanied by two or more representatives from Technoimpex. On arrival at the factory two or more police officials would join the party, but the latter never took part in any conversation. A warning was given that no photographs could be taken.	<i>a'</i> •
Technoimpex now has a showroom near their office building and a number of small manufacturing units employing from 8 to 20 persons making spares for industry have been started recently in and around Budapest. These are mainly temporary, often being in garages, and will be abandoned when new factories are completed. The area planned for new factories for machine tools, electrical and light engineering is at the southwest end of Lake Balaton bounded by Gydr, Ssombathely, Nagykanissa, and up to the lake. Another new factory area is Pestssenterssebet, Soroksar, and south of Csepel.	
An agreement was signed with Technoimpex for radial	25 X 1
were for three months credit. After the first order final-	25 X 1
was expressed in barter trade and requirement for one each portable	25X1 25X1 25X1
